

Pre-Fabricated GRP Brick Effect Chimney Range

The GRP Developer stack is completely manufactured in Glass Reinforced Plastic made to imitate brick, render and lead flashing materials. They are available in a variety of sizes, finishing and detail.

The features and benefits of the GRP Developer stack are:

Features

- Clad in any real brick, stone or render prepared
- Bespoke corbel and brick detailing
- Cap, flaunching and wide selection of pot options
- Can be used for live class 1 or 2 chimney systems

Benefits

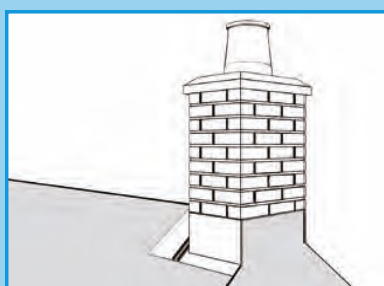

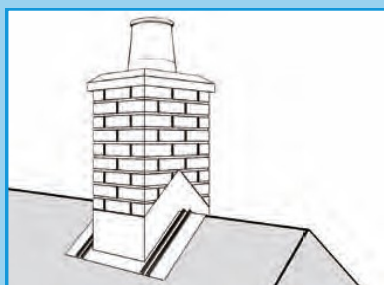

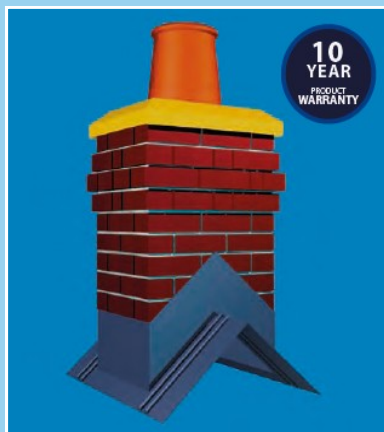

- Can be matched exactly to any brick or stone detail
- Can be matched exactly to mortar or render on site
- Simple lead flashing gives significant cost and time saving over traditional lead work
- Quick and easy to install

Warranty

The GRP Developer and Brick Clad ranges are supplied with a 10 year product warranty against water ingress. Our warranty will only be valid to our products that are installed following the lifting and fitting instructions. Please refer to the full Lifting and Fitting Instructions booklet which is available as a separate document.

Services

At Premier Building Products we offer a full estimating and quantities investigation from site drawings and a site call off service for products as you require them. Visit our web site or contact us for AutoCAD drawings of our products to specify on your project drawings. For our brick clad or bespoke products we can collect bricks from site if required. All chimneys are supplied to site with lifting and fitting instructions and lifting eyes where necessary or requested.
