

Cedral Weatherboard

We are an approved stockist of Eternit Weatherboard and offer a full estimating and support service.

Advantages

- Looks good, won't rot
- Withstands harshest weather conditions
- Adds interest, adds value
- Class O Fire Performance
- 10 year maintenance free warranty
- Easy to install
- Use in the same way as wood

Key Features

- Timber-like grain and texture
- Immune to pest and insect infestation
- Withstands harshest weather conditions
- Class O fire performance
- Low maintenance alternative to PVCu

Premier Building Products Anglia offer Eternit Weatherboard as a man-made alternative to timber. It is a unique and aesthetically pleasing form of cladding which retains all the appeal of timber without the on-going maintenance.

The unique formulation of the board frees it from attack by vermin and eliminates the risk of rot. The result is a long life timber-like product which is significantly superior for PVCu substitutes. Weatherboard can be supplied in a Natural finish for site painting, or in one of 22 factory applied colours.

(please check for stock availability)

Available in 22 factory applied colours or in any colour with a RAL / BS number.

Cedral Weatherboard

We are an approved stockist of Eternit Weatherboard and offer a full estimating and support service.

Information

- Weatherboard can be used to replace materials such as timber planking, PVCu sidings and similar materials.
- It can add interest to gable walls; adorn dormers; clad window areas that have become an eyesore; give garages a make-over; beautify barn conversions.
- The use of the material is limited only by your imagination.
